No. 1

1 Appreciation of the work of the late Dr D.B. Powell

3 The interpretation of vibrational spectra

MOLECULAR SPECTROSCOPY

K.M. Mukherjee, A.K. Maity, T.N. Misra and S.K. Nandy 5 Surface enhanced Raman spectra of isomeric phenetidines in silver colloids

M.M. Campos-Vallette, G. Diaz F., J.A. Costamagna, J.A. Vargas and V.H. Poblete 13 Vibrational study and structure of N-(substituted 5-bromo hydroxyphenylaldiminate) Co(II) complexes

G. Calzaferri and R. Imhof 23 In-situ attenuated total reflection FTIR investigations of H_2O, $HSiCl_3$ and $Co_2(CO)_8$ on ZnSe in the range 600–4000 cm^{-1}

A. Pawlukojc, J. Leciejewicz and I. Natkaniec 29 The INS spectroscopy of amino acids: L-leucine

A.A. El-Azhary 33 Vibrational analysis of the spectra of 1,3,4-oxadiazole, 1,3,4-thiadiazole, 1,2,5-oxadiazole and 1,2,5-thiadiazole: comparison between DFT, MP2 and HF force fields

J.E. Eldridge, Y. Xie, H.H. Wang, J.M. Williams, A.M. Kini and J.A. Schlueter 45 Electron–phonon effects in the organic superconductor κ-(BEDT-TTF)$_2$Cu[N(CN)$_2$]Br

I. Plaza, J. Rubín, M.A. Laguna and J. Bartolomé 57 Optical spectroscopy of the NH_4^+ internal vibrations in the orthorhombic phase of NH_4MF_3 (M is Mn, Zn) perovskites

A. Tine and J.-J. Aaron 69 Quantitative treatment of the substituent effects on the electronic absorption spectra of indole derivatives

BIOMOLECULAR SPECTROSCOPY

R.M. Lösel, A.H. Erbse, J.H. Nett, J.G. Wise, G. Berger, G. Girault and P.D. Vogel 73 Investigating the structure of nucleotide binding sites on the chloroplast F_1-ATPase using electron spin resonance spectroscopy

M. Engelke, H.-C. Klockmann and H.A. Diehl	85	Gramicidin affects the transverse and lateral distribution of pyrene and pyrene derived probes in lipid bilayers
A. Hickel, G. Gradnig, H. Griengl, M. Schall and H. Sterk	93	Determination of the time course of an enzymatic reaction by ^{1}H NMR spectroscopy: hydroxynitrile lyase catalysed transhydrocyanation
D. Wróbel, A. Planner and B. Perska	97	Time-resolved delayed luminescence of chlorophyll *a* in anhydrous polymer systems
E. Hamacher, J. Kruip, M. Rögner and W. Mäntele	107	Characterization of the primary electron donor of photosystem I, P700, by electrochemistry and Fourier transform infrared (FTIR) difference spectroscopy
E.N. Antonov, V.N. Bagratashvili, V.K. Popov, E.N. Sobol and S.M. Howdle	123	Determination of the stability of laser deposited apatite coatings in phosphate buffered saline solution using Fourier transform infrared (FTIR) spectroscopy

SPECTROCHIMICA ACTA

PART A: MOLECULAR AND BIOMOLECULAR SPECTROSCOPY

NOTES FOR CONTRIBUTORS

General

The journal publishes *Letters*, full length *Papers* and *Review Articles*. All contributions should have clear scientific value and report new data, procedures, equipment, or new theoretical considerations, as noted in the Aims and Scope for either "Molecular Spectroscopy" or "Biomolecular Spectroscopy".

Letters are meant for publication of important new results in concise form. *Letters* should not exceed the equivalent of 5000 words including figures and tables. Special attention will be given to ensure rapid publication of contributions accepted as *Letters*.

Papers should be complete and authoritative accounts of work which have special significance, general interest and which are presented clearly and concisely.

Review Articles are commissioned by the Editors on the advice of the Editorial Advisory Board. Authors wishing to submit a review article should contact an Editor or a member of the Board.

The submission of a contribution for publication in *Spectrochimica Acta Part A* is held to imply that it has not previously been published in any language, that it is not under consideration for publication elsewhere, and that if accepted for publication it will not be published elsewhere without the written approval of the Editors and consent of the Publisher.

Submission of Contributors

Authors should submit their contribution to the appropriate section (Molecular Spectroscopy or Biomolecular Spectroscopy) as follows:

Molecular Spectroscopy

Typescripts should be submitted to one of the Editors: Professor Sidney Kettle or Professor Jeffrey Steinfeld.

Professor Sidney Kettle, School of Chemical Sciences, University of East Anglia, Norwich NR4 7TJ, UK
Fax: +44 1263 731721

Professor Jeffrey Steinfeld, Department of Chemistry, Massachusetts Institute of Technology, Cambridge, MA 02139, USA
Fax: +1 617 253 7030
e-mail: jistein@mit.edu

Contributions may be written in English, French or German, but English is the preferred language. For all papers an abstract in English must be provided.

Biomolecular Spectroscopy

Typescripts should be submitted to one of the Editors: Professor Arnold Hoff or Professor James Norris, or directly to an expert member of the Editorial Advisory Board for Biomolecular Spectroscopy. Final responsibility for acceptance or rejection always rests with the Editors.

Professor Arnold J. Hoff, Huygens Laboratory, Leiden University, Niels Bohrweg 2, PO Box 9504, 2300 RA Leiden, The Netherlands
Fax: +31 71 5275819

Professor James R. Norris, Department of Chemistry, University of Chicago, 5735 S. Ellis Avenue, Chicago, IL 60637, USA
Fax: +1 312 702 2879

The full addresses of Editorial Advisory Board members are given in the first issue of each volume of the journal.

All contributions must be written in English.

Typescripts may be submitted by fax but should be backed up by submission using normal mail. All authors are requested to include a note of their telephone number, fax number and e-mail address when submitting their typescript.

Format of Contributions

All contributions should be submitted in triplicate. They should be typed on one side of the page only, and the text should be double spaced with wide margins.

Authors should also submit a copy of any paper included in the references which is not yet published, e.g. "in press" or "submitted for publication". To minimize postal charges, submitted materials is not in general returned to authors. Original drawings and photographs can be returned to an author if requested; otherwise these are discarded one month after publication.

In preparing their typescript authors are encouraged to familiarize themselves with, and to follow, the format of articles published in current issues of the journal.

Figures, including Photographs

The original line drawings or photographs for figures must be supplied with one of the copies of the typescript. Each figure should be clearly marked on the back with the names of the authors and the figure number.

Captions for figures should be typed on a separate sheet.

Line drawings should always be carefully prepared at about twice the final size, on plain white drawing paper, and suitable for direct reproduction. Laser printer output at 300 dots per inch for a two-to-one reduction on good quality paper is acceptable. Authors should take particular care to ensure that lettering on a figure will remain clearly legible after reduction.

Photographs should be enlarged sufficiently to permit clear reproduction. If words or numbers appear in photographs two copies are required, one with the words or numbers clearly overprinted and the other without inscription.

Colour Illustrations can be reproduced at the author's expense. The author should contact the Publisher for details. Fax: (+ 44) 1865 314990.

Tables

Each *Table* should be supplied on a separate sheet and should include a caption.

Tables should be constructed as to be intelligible without reference to the text, every table and column being provided with a heading. Units of measurement must always be clearly indicated. Unless it is essential to the argument, tables should not list the results of individual experiments, but should summarize results by an accepted method of expression (e.g. standard deviation). The same information should not be produced in both tables and figures.

Units

SI units are required.

Nomenclature

All nomenclature should conform as closely as possible to the rules established by IUPAC and IUPAP, as summarized in the following publications: N. Sheppard, H.A. Willis and J.C. Rigg, Spectrochimica Acta Part A, 43 (1987) 1; E.R. Cohen and P. Giacomo, Physica, 146A (1987) 1–68; I. Mills et al., Quantities, Units and Symbols in Physical Chemistry, Blackwell, Oxford (1988).

References

References should be indicated in the text by consecutive numbers in square brackets; the full references should be listed at the end of the paper in the following form:

[1] C.J. Pedersen, J. Am. Chem. Soc., 89 (1967) 7017.

[4] R.D. Amos, Advances in Chemical Physics, I. Prigogine and S.A. Rice (Eds.), Vol. 67, p. 99. Wiley, New York, 1987.

Journal-name abbreviations should follow those adopted by The Chemical Abstracts Service (Bibliographic Guide for Editors and Authors, The American Chemical Society, Washington, DC, 1974).

Proofs, Reprints and Copyright

Proofs: Where multiple authors are concerned it is important to indicate, when submitting a contribution, the author to whom correspondence and proofs should be sent. Only essential corrections should be made at proof stage. Alterations to the text, other than printer's errors, may be charged to the author.
The Publisher reserves the right to publish a contribution without waiting for corrected proofs to be returned by the author, if waiting would cause undue delay.
Reprints: No page charges are assessed and 50 free reprints will be provided to the principal author. Authors should indicate the number of additional paid reprints required when returning their proofs.
Copyright: Authors are requested to read the note on copyright published on the verso of the title page of each issue. Publication of a contribution may have to be delayed until a signed transfer of copyright agreement has been received by mail. Authors are recommended to send the agreement at the same time as the proofs are returned.

Deposited Documents

From time to time, the journal receives typescripts which contain extensive tabular or graphical data. Though such data may be of archival interest, and should be available to workers in the field, it is often impractical to publish such material in its entirety. For this reason, the journal has entered into a supplementary data deposition scheme with the British Library Document Supply Centre, details of which have been given in the last page of *Spectrochim. Acta Part A*, 43 No. 6 (June 1987). Authors are encouraged to avail themselves of this service when appropriate. Persons wishing to obtain copies of deposited material should write, citing the accession number, directly to Service Enquiries, British Library Lending Library, Document Supply Centre, Boston Spa, Wetherby, West Yorkshire LS23 7BQ, U.K. Requesters must quote the relevant SUP number (e.g. SUP 12345). Supplementary Publications are made available on a pro forma invoice basis.
